STORY OF THE MASTERPIECE

Classic car restoration is our passion, perfection is our claim. As enthusiasts of historic vehicle restoration, we awaken the splendor of bygone times and ensure an unforgettable driving experience with our craftsmanship.

A vision already exists – but the search for the perfect base vehicle and the time-consuming build process are standing in the way of this dream?

That's precisely where we come in. To give our customers a head start, we have begun to pre-finish selected body shells to our uncompromising Masterpiece standard. This project can be finished in approximately a year.

The build is done exclusively in steel. We deliberately avoid carbon fiber, fiberglass, or other composite materials. Each body shell is completely disassembled, stripped of its paint, and then rebuilt using traditional craftsmanship. Form, structure, and precision fit are created from steel – complemented by meticulous pewter work where perfection knows no bounds.

As part of this process, the body shells are converted to ST-wide specifications, professionally primed, and stored under optimal conditions. The result is a structure that not only impresses visually but also stands the test of time. All structural work is carried out in such a way that future customizations can be implemented with maximum freedom – without compromises, without hidden solutions, without artificial materials.

What remains is genuine substance: steel, craftsmanship, and passion – the foundation for a masterpiece that you not only see but also feel.

You don't join at the beginning – but precisely at the point where an idea is transformed into a true masterpiece.
